Position: **Right-hand column**

THIS IS NOT A ZONING PERMIT! This determination confirms that the proposed use of the site is a permitted use as per the zoning regulations; however, this document **is not** to be substituted for a zoning permit. This determination expires 6 months from the issuance date.

The applicant may now proceed with having the Health Department determine the suitability for on-site wastewater disposal or for a re-certification if an existing system is present. Once the Health Department permits are received, the applicant must return to the Planning and Development Department to obtain **final zoning permits and building permits**. Any work commenced prior to receiving those permits is grounds for enforcement and/or a fine.
