Therefore, some boards may sit slightly higher than others. **Wood Ages with Light and Time:** All wood changes in color with exposure to light (both natural and artificial). The darker the stain color, the less apparent this aging will be. This color change will be more noticeable in lighter colors, which will darken. Sections of the floor which are covered by area rugs or furniture may age

_____ Buyer(s) _____ Builder

differently. These changes are not covered by manufacturers' warranties. Floor noise: Not all hardwood, wood laminate and engineered wood sound alike when being walked on. Minor squeaks and pops are to be expected as a result of expanding and contracting wood flooring. They may come and go as the pressure between individual boards changes. Cleaning and Maintenance: Sweep with a soft bristle broom, and/or vacuum with a soft floor attachment. Clean only with a professional product approved for pre-finished wood or laminate (see the manufacturer's instructions for approved products). Do not wet mop a pre-finished wood or laminate floor. Moisture: Moisture can damage the floor. Wipe up spills immediately; exposure to moisture or the use of improper cleaning products or methods will allow water to get into the cracks between the boards and cause swelling or cupping. Damages from the above exposures to moisture are not covered under warranty. Scratches and Dents: Put soft plastic slides under the legs of furniture to help prevent scuffing and scratching. Fabric or felt laced glides are not recommended because they trap particles which may scratch the floor. When moving furniture or other objects, do not slide or even roll on wood flooring (wheels may dent the floor). It is best to pick up the object completely. Impacts (such as from a dropped object or high-heeled shoes) may leave dents. Scratches and dents are not covered under warranty. Gaps and Separation Between Boards: Wood flooring expands and contracts with changes in your home's relative humidity. Potential purchasers should be cautioned that cracks will emerge, and we will not make any attempts to repair or replace boards with small horizontal cracks (unless part of another problem). Installation: Large areas of floating flooring sometimes have to be broken into segments. This is done by installing a transition strip. They are usually placed at a doorway or at the entrance to another room or hallway. Not doing so will void manufacturer warranties and may cause buckling or separation of the flooring. Putty and Filler: Putty and/or filler are used on every hardwood floor. Since factory finished floors must be installed with the finish in place, colored putty is used to conceal the face. How to Inspect a Wood Floor: Because these products are intended as flooring, the accepted point of view from which to inspect a wood floor is from a standing position under normal lighting.

22. Cabinet Acknowledgement: Natural Variation Between Components: Your cabinets will have variations from part to part including the wood grain pattern, finish texture, shading, and stain or paint color. Samples from Showroom: Samples will not exhibit all possible variations you will see in your cabinets. No two cabinets are alike; your new cabinets may appear slightly different. Offset Edges: Factory finished cabinets are not sanded to the exact same level after installation. Therefore, some face frames, doors, trim or fillers may sit slightly offset compared to others. Wood Ages with Light and Time: All wood changes in color with exposure to light (both natural and artificial). The darker the stain color, the less apparent this aging will be. This color change will be more noticeable in lighter colors, which will darken. These changes are not covered by manufacturers' warranties. Cleaning and Maintenance: Clean only with a professional product approved for pre-finished cabinets (see the manufacturer's instructions for approved products). Moisture: Moisture can damage the cabinets. Exposure to moisture or the use of improper cleaning products or methods can cause swelling or cupping. Damages from the above exposures to moisture are not covered under warranty. Scratches and Dents: Scratches and dents (or other cosmetic concerns not noted at time of install) are not covered under warranty. Gaps and Separation Between Cabinet Parts: Wood expands and contracts with changes in your home's relative humidity. Purchasers should be cautioned that cracks will emerge, and we will not make any attempts to repair or replace cabinet parts with small cracks (unless part of another problem). Maintain proper humidity in the home to minimize door warpage. Putty and Filler: Putty and/or filler are used on every cabinet. Since factory finished cabinets must be installed with the finish in place, colored putty is used to conceal cosmetic concerns. All cabinets require touch-up after installation. How to Inspect a Wood Cabinet: The accepted point of view from which to inspect a cabinet is from 5 feet away or from the center of the room, under normal lighting.

23. The buyer is responsible for having the utilities (i.e., electric, water/sewer, gas) turned on in their name within **48 hours** after closing. After 48 hours the builder will disconnect all utilities.
