This Operation Permit indicates that the system has been  
 installed in accordance with state regulations and should  
 not be taken as a guarantee that the system will function  
 for any given length of time.  
 Authorized Agent Greg Hodges, REAS

# CONDITIONS OF THE OPERATION PERMIT

A copy of this operation permit shall be given to the owner and shall remain in the possession of the owner (and subsequent owners) for the life of the wastewater system.

Final approval for this system indicates only that the system has been installed in accordance with state regulations, but in no way should be taken as a guarantee that the system will function satisfactorily for any given length of time.

The system must be operated in accordance with the laws (Article 11 of Chapter 130A of the General Statutes of North Carolina) and rules (North Carolina Administrative Code T15A. 18A .1900) for sewage treatment and disposal systems, and the conditions specified in the improvement permit, authorization for wastewater system construction, and this operation permit.

This permit may be suspended or revoked if the soils fail to adequately absorb and treat the wastes. The system must be operated and maintained in a manner which will not create a public health hazard or nuisance by discharging to the ground surface, surface waters, or ground water at any time during the operation of the system.

The owner shall keep the plumbing system in the facility in good repair and eliminate leaks, drips, or excess flows as they are found.

This operation permit may become invalid and be suspended or revoked should the facility type, wastewater characteristics, or design flow change.

Adequate measures shall be taken to divert stormwater or any standing water from the disposal field area.

The designated repair area shall be reserved for the installation of additional nitrification fields and shall not be covered with structures or impervious materials, including asphalt or gravel.

The owner/operator shall report by telephone or in person to the Craven County Health Department (252) 636-4936 as soon as possible, but in no case more than 48 hours upon finding the system is malfunctioning (i.e. the surfacing or backing-up of effluent, or the discharging of effluent directly into groundwater or surface water) or when repairs are needed.

Any duly authorized officer, employee, or representative of the Craven County Health Department may, upon presentation of credentials, enter and inspect any property, place, or premises on or related to the disposal site and system at any reasonable time for the purpose of determining compliance with this permit; may inspect or copy any records that must be kept under the terms and conditions of this permit; or may obtain samples of wastewater, effluent, groundwater, surface water, or leachate.

For systems requiring an operator (see below), a contract shall have been executed between the system owner and a licensed operator for the perpetual operation and maintenance of the system. A copy shall have been submitted to the health department, prior to the issuance of this operation permit. It shall be a condition of this operation permit that subsequent owners of the system execute such a contract. It shall be the responsibility of the owner to inform potential subsequent owners of the system type, operational needs and contract requirements.

## Understanding the Installed System Code (printed on front of this permit)

<u>Trench Type Code</u>	+	<u>Distribution Code</u>	+	<u>Trench Placement Code</u>	+	<u>Drainfield Configuration Code</u>
001 = Rock Trench		P = Pump		M = Mound (Tb's <12")		T = trench
002 = Rock Bed		G = Gravity		C = Cap (Tb's 12"-17")		B = bed
003 = Fill System		S = Siphon		S = Shallow (Tb's 18"-35")		N = Not Applicable
<b>004 = Low Pressure Pipe</b>		D = Dual Pumps		D = Deep (Tb's ≥ 36")		
050 = PPBPS (Panel Blocks)		U = Dual Siphons		N = Not Applicable		
051 = Large Diameter Pipe		A = Dual Gravity				
100-599 = Innovative or Accepted Systems (see permit for type).		N = Not Applicable				
800-850 = Non-Ground Absorption System (see permit for type).						
999 = Not Applicable						
<p>Note: System codes with a <b>box</b> around them indicate septic systems requiring a certified operator.</p>						
				<u>Pre-Treatment Code</u>	+	<u>Volume Code</u>
				<b>600-799 = System with Pre-Treatment (see permit for type).</b>		<b>II = Volume &gt; 3000 gpd</b>
				999 = Not Applicable		I = Volume 481 gpd - 2999 gpd
						L = Volume ≤ 480 gpd
						R = Reuse or Recycle
						N = N/A

### NOTE:

This permit does not exempt you from any rule, regulation or ordinance of any federal, state, and/or local agency nor any restrictive covenant. You must comply with all restrictive covenants, rules, regulations or ordinance prior to building, locating or relocating a residence, business, or place of public assembly.
