

**MOISTURE NOTICE**

Many building materials may become damp. Circumstances that encourage this include environmental factors, site grading and inadequate ventilation.

Moisture may be reduced, in part, by the following:

- Proper site preparation procedures
- Proper use of drainage tanks and proper ventilation
- Complete maintenance plans and proper action
- Regular use of exhaust fans
- Regular use of any particular action

Regular use of exhaust fans is contained in the following:

- Regular use of exhaust fans
- Regular use of any particular action

These examples are to the manufacturer's manual for further information. Specific information concerning the moisture from your home should be obtained from the manufacturer.

If you have any questions concerning the moisture from your home, please contact the manufacturer. You should contact the manufacturer for more information.
