Permit Date: 12/15/21

Authorized Agent: Adam Nobles

Well Area
 ↑
 100' min

Electric Fence

It is the applicant's responsibility to ensure house location is in compliance with all zoning setbacks as detailed in Bladen County Zoning Ordinance, Effective April 1, 2003

Structure location may vary as long as it is at least 5'.0" from the septic system. However, due to the unknown finish floor elevation and building drain invert elevations, a septic tank effluent pump (step) may be required. Is gravity sewage flow from the structure to the septic tank standard meet the North Carolina Building code as it pertains to plumbing. If the structure location or any other situation prevents gravity sewage flow, you may request a revision of the Construction Authorization to reflect a pump system or other solution.
