This mobile home has been thermally insulated to conform with the requirements of the Federal Mobile Home Construction and Safety Standards for all locations within climatic zone 2 (see map above).

The above heating equipment has the capacity to maintain an average 70°F temperature in this home at outdoor temperatures of -74 °F.

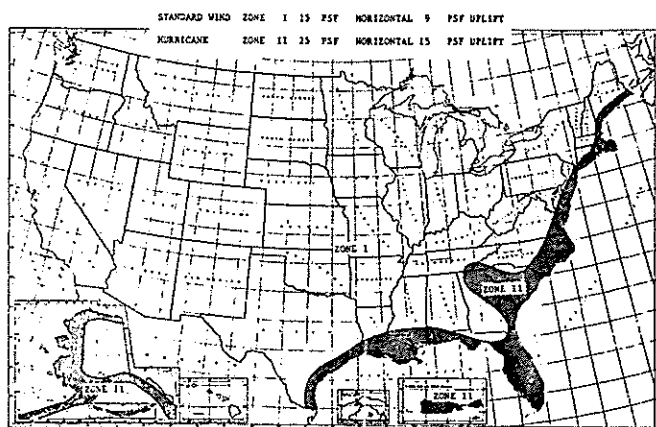

To maximize furnace operating economy, and to conserve energy, it is recommended that this home be installed where outdoor winter design temperature (97½%) is not higher than -31 °F.

The above information has been calculated assuming a maximum wind velocity of 15 mph at standard atmospheric pressure.

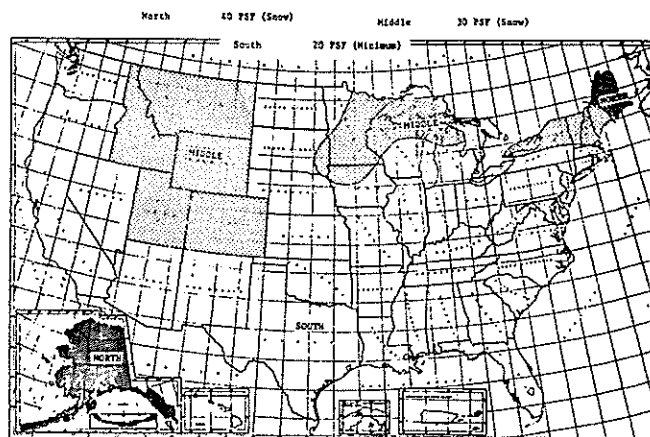

Check the Applicable Box:

- ☐ The air distribution system of this home has not been designed in anticipation of its use with a central air conditioning system.
- ☒ The air distribution system of this home is suitable for the installation of central air conditioning (see attached comfort cooling certificate).
- ☐ Central air conditioning system is provided with this home (see attached comfort cooling certificate).

This mobile home is designed for wind loads in zone 2 (see zone map below) and roof loads in north zone (see zone map below).
